

# SIFT-MS User Discussion Group Meeting 3rd November 2017, Cambridge, UK

Pushing the boundaries of analytical labs to include SIFT-MS as a complimentary technique. The SIFT-MS user community is growing rapidly covering a diverse range of applications. Bringing this technique into the lab has raised a variety of questions for the users including validation, sample introduction and the making up of standards. This meeting is an opportunity for those currently using, as well as those considering to use this technology in the future, to come together and discuss some of these topics.

## Speakers:

- **Intertek - Joe Wicks**  
The validation process, taking a look at how it might be done.
- **University of York - Marvin Shaw**  
Making up standards and calibration.
- **Syft Technologies**  
LabSyft software, the new version, reporting and compliance.

## Current Applications:

- Formaldehyde
- Atmospheric monitoring of NOx
- Personal health care products
- Fragrance monitoring
- Residual solvents
- Workplace monitoring
- Fast turn-around sampling
